

NEW

stormor[®] shelving

MANUFACTURED IN THE UK

understanding

future requirements

We recognise that as markets and legislation change, so do the demands this places on our product range.

For example,

- Compliance with the new Freedom of Information Act and the Data Protection Act is now a legal requirement
- Both Acts demand quick and easy location and retrieval of information
- Full access rights come into force in January 2005

Similarly, as our economy becomes increasingly reliant on the service sector, volumes and methods of data storage increase. Records in commercial sectors such as finance continue to grow and quick, easy-to-use filing systems help in the provision of rapid-response customer service. Changes such as these drive our product development.

anticipating

your needs

Innovation in design is the key to ensuring our products meet these demands. Essentially, the goal is a shelving solution which makes optimum use of all available space whilst satisfying the huge range of demands posed by the many different products and data records which need accessible storage.

designing

simply and efficiently

The challenge was to incorporate these changing demands into a new shelving system without compromising load capacity and safety. Key design criteria were:

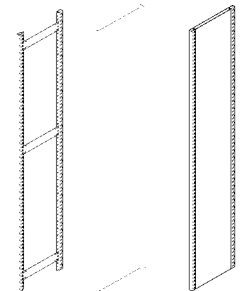

- Versatile, easy to install shelving with minimum lost storage space
- A system sufficiently adaptable to accommodate any product
- Comprehensive range of shelf and frame sizes for both general and specific requirements
- Easy-fit accessories to complement basic components
- Minimum number of components with maximum interchangeability

delivering

the right solution

The **Stormor Shelving System**:

- Slim profile shelves and frames
- Family of frames suitable for storage needs from the commercial to the workshop environment
- Clip-in accessories
- Tiered projects still available by combining the new shelves with the tried and trusted Euro frame

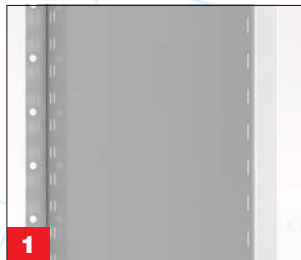

Stormor - creating optimised storage solutions

Stormor® Shelves

Interchangeable Frames

- 20mm front face ● 25mm shelf pitch ● Accepts double shelf clip
- Frames share common shelf types, rear bracing, cross-bracing and accessories

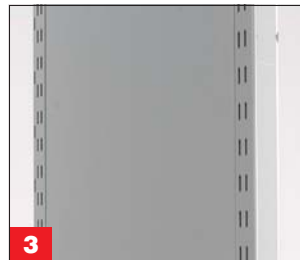

Solo Frame

Solid frame featuring a delta profile front post with a T-section rear for easy and immediate fitting of cross bracing and cladding.

Mono Frame

Clear entry, open shelving frame for heavier duty applications and where ventilation is required.

Duo Frame

Double skinned box section, clear entry frame. Also allows clear access to the full shelf width, eliminating 'snagging' of items stored. Complies with clear access requirements of BS5454.

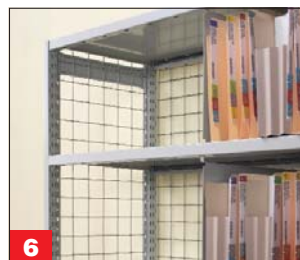

Cross Brace

Provides stability bracing for open back shelving. Used where rear cladding is not specified.

Rear Cladding

Solid interlocking steel sheets that enclose the rear of the bay. Also gives essential stability to the bay structure as an alternative to cross-bracing.

Mesh Cladding

Can be fitted to open frames and as rear cladding for all frame types. Retains visibility and ventilation for the items stored.

Dual Use Shelf

25mm section shelf with a formed open flange. Also carries suspension filing underneath the shelf at appropriate depths. Fits all above frames plus the Euro shelving frame.

Box Section Shelf

25mm welded box section shelf on the front and back edges for greater load bearing capacity. Fits all above frames plus the Euro shelving frame.

Under-shelf Divider

Divider simply clips in under the shelf to hold books, files etc upright. Divider can be re-positioned as required. For use with Dual Use shelves only.

Shelf Dividers

- For dividing shelves into compartments ■ No additional fixing clip required
- Slot into pre-punched holes in shelf

Vertical Divider

Used to divide shelves horizontally into smaller storage compartments. Reinforced leading edge provides extra strength. Easily repositioned on shelf.

Document Divider

Slim profile divider ideal for paper and record storage. Ensures maximum use of shelf capacity. Easily relocated on shelf.

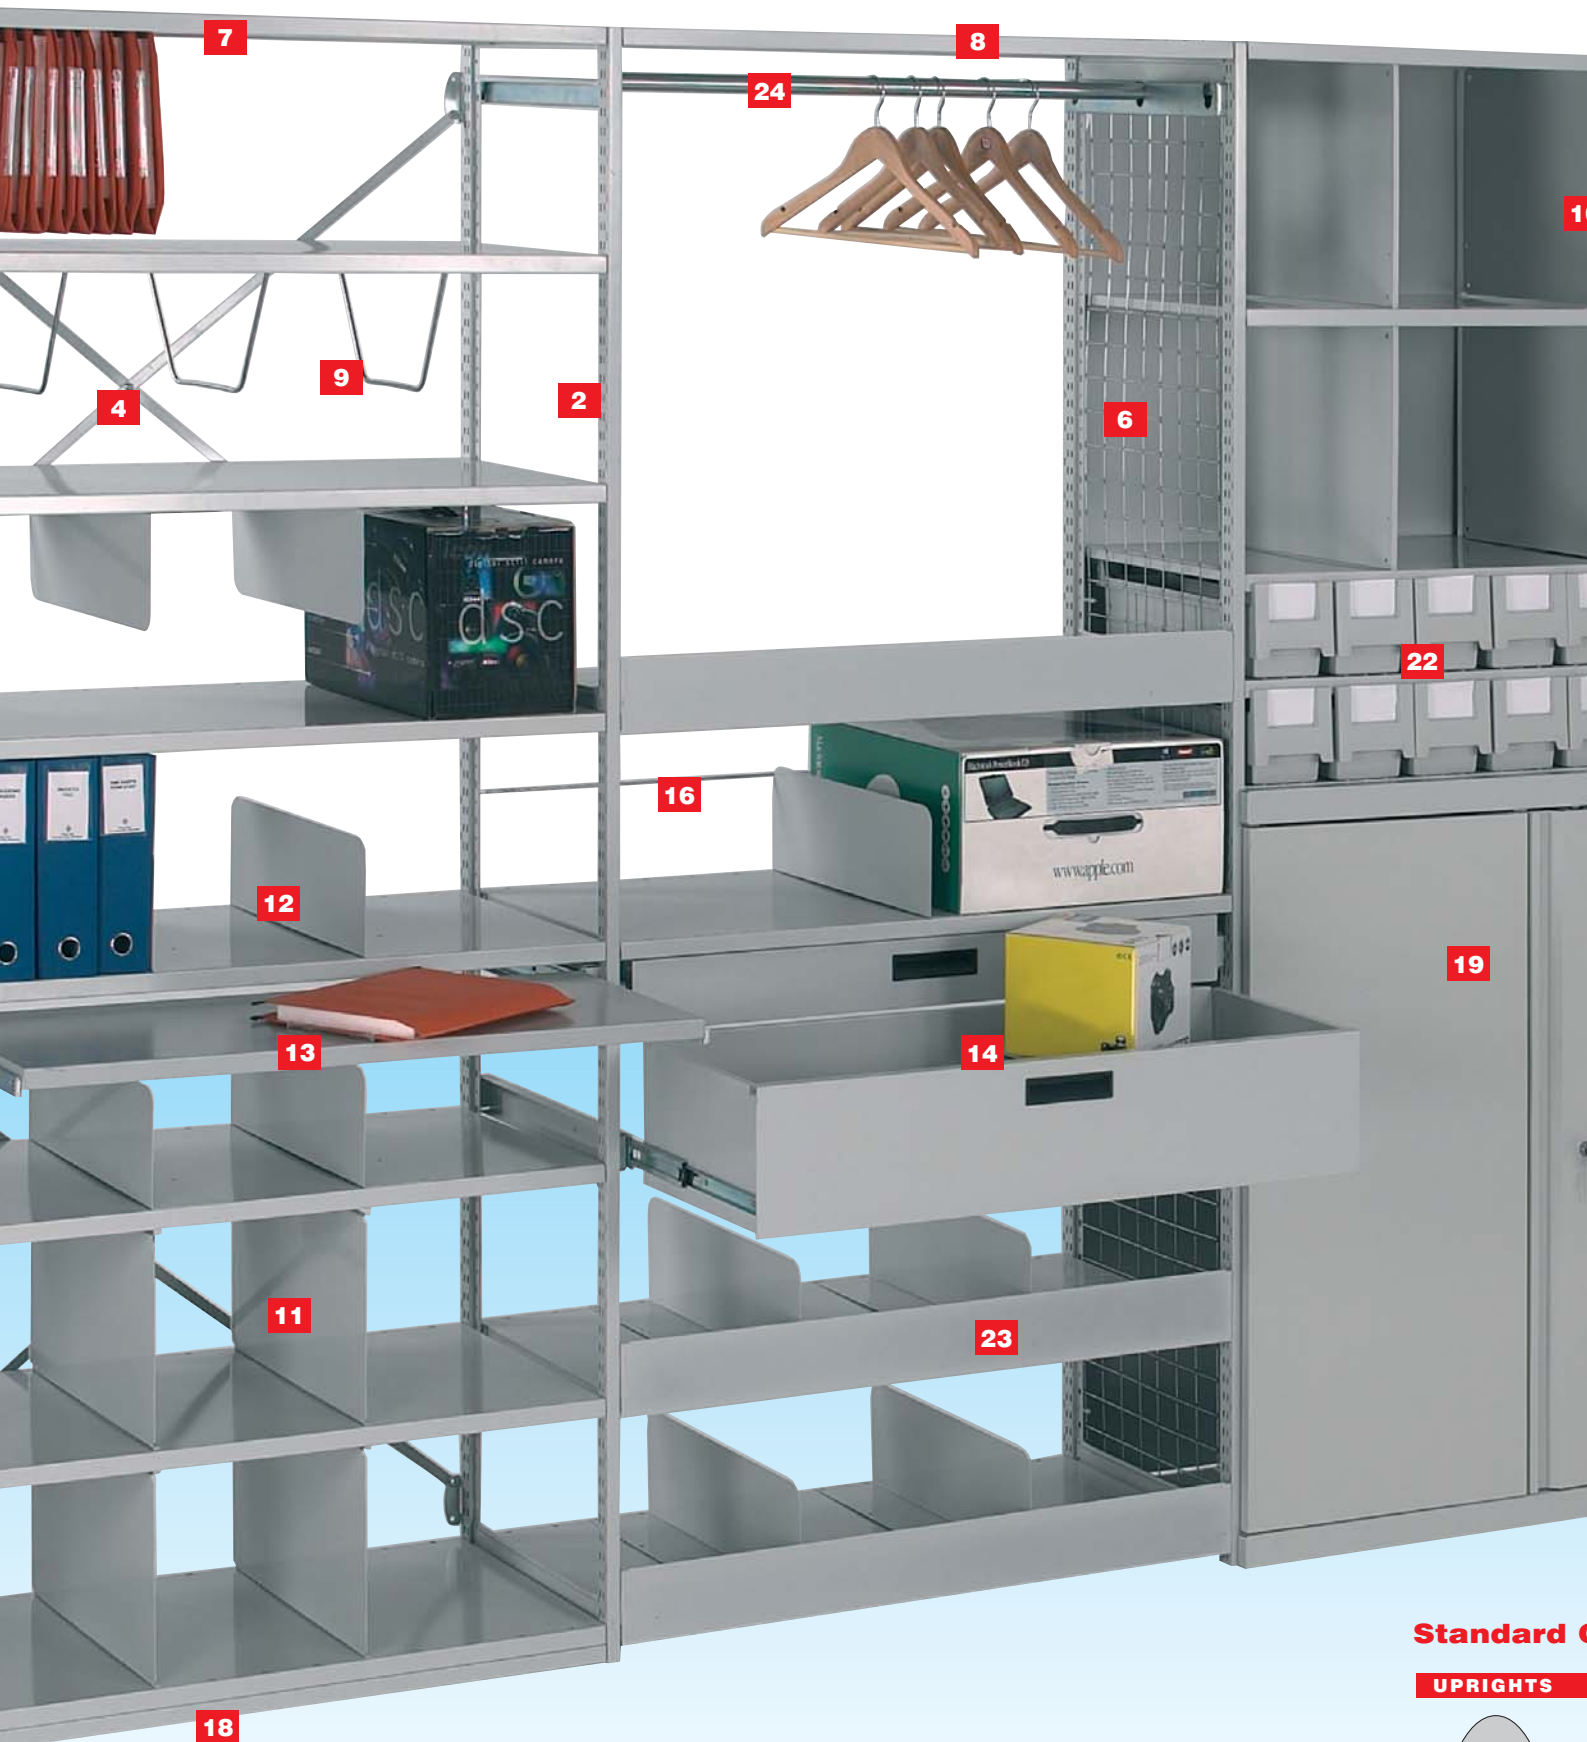

Part Height Dividers

150mm high divider which slots either on top or below the shelf to provide storage compartments or support for files and similar tall material.

Customised storage solutions

Pull-out Accessories

- Clip-in ball bearing supported runner
- 100% extension for full access to shelves

13

Pull-out Reference Shelf

Provides a flat and stable work surface for document or file reference within the aisle.

16

Back Stop

Fits across the rear of bays to prevent files falling off the back of a shelf. Simply slots into the upright.

19

Half Height Door Kit

Hinged 1100mm high door. Creates secure storage cupboard within shelving. Doors are stiffened to the full height and have 2-point locking, recessed handle and safety key.

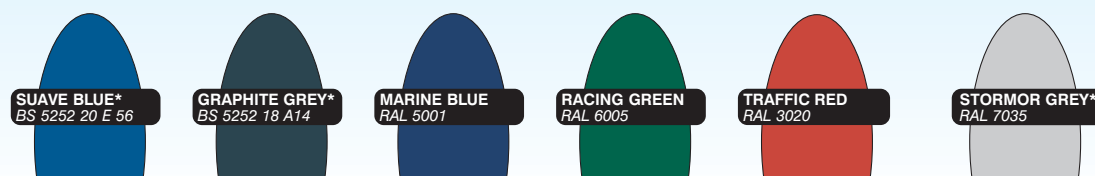

22

Plastic Drawers

Ideal for the storage of small items. Available in 3 sizes, the drawers tilt on integrated back-stops to allow easy viewing and access. Can also be sub-divided internally using dividers.

Component Colours

ers with integral stops ● Fit all frame types
 stored material ● Easily repositioned ● No fixings required

14

Pull-out Drawer

Ideal for the storage of CD's, electronic media and other small items within a shelving bay. Available in 4 heights.

15

Pull-out Filing Cradle

Can accommodate A4 and foolscap top loaded suspension files.

17

Frame Floor Clip

Simple clip-in bracket which allows all types of Stormor frames to be floor fixed. Can be shimmed by using Stormor shim plates. Fits within bay footprint.

18

Floor Plinth

Floor plinths prevent dust and debris collecting under the shelving. Simply clips to the underside of shelf to create a smooth overall finish of the front face.

20

Full Height Door Kit

Hinged doors transform shelving into a secure storage cupboard. Doors feature full height vertical stiffener, 2-point locking, recessed handled and safety key.

21

Tambour Door Kit

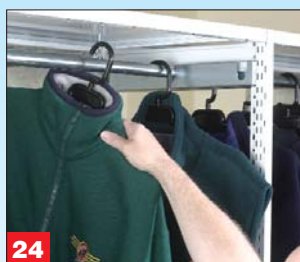

Roller shutter doors for security and dust protection of items stored. When open, door does not protrude into aisle making this an ideal solution for secure storage where aisles are narrow.

23

Bin Fronts

When fitted these prevent items falling off the front of shelves. Also when used with shelf dividers they form enclosed compartments or 'bins'. Can be used as heavier duty back-stop.

24

Clip-in Garment Hanging

System of rails and brackets which fit within bay widths to allow the hanging of garments. Rails can be re-positioned as required to create double hanging space.

NEW **Stormor** is now available to solve all shelving problems:

- General office storage
- Dedicated office filing solutions
- Large archiving projects
- Specific demands such as healthcare records
- Heritage storage
- Retail storage
- Bulk off-site storage
- Workshops and stockrooms
- Industrial storage
- Dedicated interface with our own mechanically assisted or electrically powered mobile systems to truly maximise space utilisation.

All accessories fit in all shelves, and all shelves fit in all frames. The comprehensive range of sizes and accessories ensures Stormor makes specifying and building shelving easier and quicker for more versatile solutions.

Every project is designed to meet its specific requirements, optimising storage space and minimising waste.
